

Career Opportunity**Role: Manufacturing Engineer****Location: Ramsgate, Kent**

AEM, with its head office at Stansted Airport, is a subsidiary of AMETEK. As part of AMETEK's Aerospace & Defense Division, AEM is one of the largest independent aircraft component repair and overhaul facilities in Europe.

We have an immediate full-time vacancy, at our Ramsgate site for a Manufacturing Engineer; this is a permanent role, and reports to the Operations Manager.

Job Purpose:

- Work across technical and engineering operations to deliver manufacturing engineering efficiencies and improvements across a breadth of activities; supporting existing and new products, defining processes and quantifying costs.

Main Tasks:

- Ensure manufacturing processes are capable of achieving quality, cost, volume, delivery and lead time requirements.
- Identify and share relevant manufacturing best practice.
- Leverage knowledge of industry best practice to design and coordinate implementation of process improvements to meet current and future requirements.
- Identify opportunities for cost reduction through improved processes and controls.
- Support teams to diagnose and resolve technical problems.
- Plan and manage ME related activities, across site.
- Support Team to quantify and report ME related cost structures and savings.

Qualifications:

- Degree educated in an engineering discipline or significant experience within an engineering environment
- Lean certification (highly desirable)
- Project Management (essential)

Experience:

- Minimum 5 years' experience as an ME within an engineering/ manufacturing industry, evidencing application of industry best practice. Ideally experience will have been gained in an aviation environment but not completely essential if proven success in a related industry can be demonstrated.
- Proven experience of supporting and working within multi-discipline teams.
- Possess a strong understanding of quality systems and audit compliance; proven experience of working in a highly regulated and compliant environment.
- Considerable change management experience; understands the change management cycle and experience of delivering therein.
- Experienced practitioner of continuous improvement techniques
- Excellent communication, interpersonal and leadership skills are essential.

Competencies

- Demonstrates excellent problem-solving skills, deployed in a highly communicative manner across functional departments.
- Evidence of strong people management skills; able to influence both performance and development.
- Possesses a strong commercial acumen.
- Strong project management skills with the ability to lead and direct multi-functional teams delivering to detailed plans and time-lines.
- Ability to create an atmosphere of team work and inter-departmental cooperation and respect.
- Ability to coach and mentor team members
- Strong communication skills (verbal and written)
- Strong analytical, administrative and organisation skills and excellent attention to detail

- Innovative and enthusiastic
- Ability to work under pressure, to tight deadlines and multi task
- Well organised and self-motivated.

Additional Information:

Salary: Competitive, depending upon experience
